1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Manufacturer Name: Sistersville Plant
3500 South State Route 2
FRIENDLY WV 26146

Revised: 04/23/2012
Prepared by Product Regulatory Compliance
CHEMTREC 1-800-424-9300
MSDS Contact 1-888-443-9466
Information 4information@momentive.com

Chemical Family/Use: Surfactant

Formula: Polyalkyleneoxide Modified Heptamethyltrisiloxane

HMIS
Health: 2 Flammability: 1 Reactivity: 0

NFPA
Health: 2 Flammability: 1 Reactivity: 0

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW
WARNING! Aerosol harmful if inhaled. Causes eye irritation. Repeated ingestion may cause damage to the liver, kidneys, thyroid, and blood-forming system. Repeated inhalation of aerosol of the neat liquid may cause damage to the eyes, blood-forming system, kidneys, thymus, respiratory tract, and nasal cavity.

Form: Liquid Color: Pale yellow Odor: Polyether

POTENTIAL HEALTH EFFECTS

INGESTION
Effects of repeated overexposure: Ingestion may cause: - injury to the liver - injury to the thyroid - injury to the kidney - injury to the bloodforming system

SKIN
None known. Effects of repeated overexposure: May cause the following effects: Skin irritation.

INHALATION
Harmful effects are not expected from static vapor at ambient temperature. Inhalation of an aerosol of the neat material within a confined space could result in respiratory distress and eye injury. Effects of repeated overexposure: Aerosol may cause: - injury to the eyes - injury to the nasal cavity - injury to the bloodforming system
EYES
Liquid splashed into the eye may cause discomfort. May cause the following effects: Pain - excess blinking - tear production - excess redness of the conjunctivae - swelling of the conjunctivae - iridal inflammation. These effects should resolve within two weeks. Prolonged exposure to vapor or aerosol may cause discomfort. May cause the following effects: - excess redness of the conjunctivae - possibly swelling of the conjunctivae - blurring of vision. These effects will resolve within a few hours.

MEDICAL CONDITIONS AGGRAVATED
A knowledge of the available toxicology information and of the physical and chemical properties of the material suggests that overexposure is unlikely to aggravate existing medical conditions.

SUBCHRONIC (TARGET ORGAN)
Liver; Kidney

CHRONIC EFFECTS / CARCINOGENICITY
For additional information, please see Section 11, Toxicological Information.

ROUTES OF EXPOSURE
Eye; Ingestion

4. FIRST AID MEASURES

INGESTION
Do not induce vomiting. If conscious, drink plenty of water. Call a physician or poison control center immediately.
Material Safety Data Sheet

Silwet* L-77
Siloxane Polyalkyleneoxide Copolymer

SKIN
Wash off promptly and flush contaminated skin with water. Promptly remove clothing if soaked through and flush skin with water. Get medical attention if symptoms persist.

INHALATION
After inhalation of aerosol/mist seek medical advice immediately. Move the exposed person to fresh air at once. If breathing is difficult, give oxygen. Call a physician or poison control center immediately.

EYES
Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Get medical attention if symptoms persist.

NOTE TO PHYSICIAN
Treatment is symptomatic and supportive.

5. FIRE-FIGHTING MEASURES

FLASH POINT: 116 °C; 241 °F
METHOD ASTM D 93
FLAMMABLE LIMITS LEL: No data available.
FLAMMABLE LIMITS UEL: No data available.

SENSITIVITY TO MECHANICAL IMPACT: No

SENSITIVITY TO STATIC DISCHARGE
Sensitivity to static discharge is not expected.

EXTINGUISHING MEDIA
All standard extinguishing agents are suitable.

SPECIAL FIRE FIGHTING PROCEDURES
Firefighters must wear NIOSH/MSHA approved positive pressure self-contained breathing apparatus with full face mask and full protective clothing.

6. ACCIDENTAL RELEASE MEASURES

ACTION TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED
Wipe, scrape or soak up in an inert material and put in a container for disposal. Wash walking surfaces with detergent and water to reduce slipping hazard. Wear proper protective equipment as specified in the protective equipment section.
7. HANDLING AND STORAGE

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE
Avoid contact with skin and eyes. Avoid breathing mists or vapors. Keep out of reach of children.
Attention: Not for injection into humans.

OTHER PRECAUTIONS
Consult the manufacturer before using an aerosol of the neat liquid.

STORAGE
Keep container closed. Store in original container.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS
Provide eyewash station and safety shower. General (mechanical) room ventilation is expected to be satisfactory if handled at low temperatures or in covered equipment.

RESPIRATORY PROTECTION
If exposure limits are exceeded or respiratory irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Supplied air respirators may be required for non-routine or emergency situations. Respiratory protection must be provided in accordance with OSHA regulations (see 29CFR 1910.134).

PROTECTIVE GLOVES
Chemical resistant gloves

EYE AND FACE PROTECTION
Safety glasses with side shields

OTHER PROTECTIVE EQUIPMENT
Wear suitable protective clothing and eye/face protection.

10. STABILITY AND REACTIVITY

STABILITY
Stable

HAZARDOUS POLYMERIZATION.
Hazardous polymerisation does not occur.

HAZARDOUS THERMAL DECOMPOSITION / COMBUSTION PRODUCTS
In case of fire, gives off (emits): Carbon oxides; Oxides of silicon; Formaldehyde; Carbon monoxide is highly toxic if inhaled; carbon dioxide in sufficient concentrations can act as an asphyxiant; Acute overexposure to the products of combustion may result in irritation of the respiratory tract; This product contains methylpolysiloxanes which can generate formaldehyde at approximately 300 degrees Fahrenheit (150°C) and above, in atmospheres which contain oxygen. Formaldehyde is a skin and respiratory sensitizer, eye and throat irritant, acute toxicant, and potential cancer hazard. A MSDS for formaldehyde is available from Momentive.

INCOMPATIBLE MATERIALS
None known.

CONDITIONS TO AVOID
None known.
11. TOXICOLOGICAL INFORMATION

ACUTE ORAL
LD50; Species: Rat; > 2,000 mg/kg; Remarks: slightly toxic

REPEATED DOSE TOXICITY
Species: Rat; Exposure time: 28 d
NOAEL - No Observable Adverse Effect Level: 450 mg/kg.

ACUTE DERMAL
LD50; Species: Rat; > 2,000 mg/kg; Remarks: slightly toxic

ACUTE INHALATION
LC50; Species: Rat; 2 mg/l; Remarks: Aerosol.

LC50; Species: Rat; > 11.78 mg/l; Remarks: Aerosol., 5% Diluted aqueous solution

OTHER
This material was not mutagenic in an Ames bacterial assay or in three mammalian test systems including the Chinese hamster ovary (CHO)/HGPRT gene mutation assay, a micronucleus cytogenetic assay in mice, and an in vitro mammalian cytogenetic test.

In a repeated skin application study with rats, this material caused moderate skin irritation which resolved during a post-application recovery period. There was no evidence for percutaneous cumulative or specific organ toxicity, and no effect on male or female reproductive systems.

Findings from a 14-day dietary feeding study with rats show that high dosage repeated ingestion of this material causes reversible adverse effects on the male and female reproductive tracts. Additional effects seen include increased liver weight, altered blood cytology/chemistry, and thyroid enlargement (primarily hypertrophy, with some hyperplasia). Evidence of partial or complete recovery was found over a 28-day recovery period.

Findings from a repeat 9-day aerosol inhalation toxicity study with rats show a no-observable-effect-level (NOEL) of less than 0.025 mg/l. Symptoms of toxicity included rales, gasping, ocular opacity, prostration, hypothermia, reduced body weight gain and food consumption, changes in clinical pathology, decreased thymus weight, and microscopic lesions in the nasal cavity. There was no effect on the male or female reproductive systems. It is not anticipated that the use of aqueous dilutions of this product would result in this type of aerosol exposure.

SENSITIZATION
Species: Guinea Pig; Result: Did not cause sensitization on laboratory animals.

SKIN IRRITATION.
Species: Rabbit; Result: No skin irritation

EYE IRRITATION
Species: Rabbit; Result: Strongly irritating.
OTHER EFFECTS OF OVEREXPOSURE
No adverse effects anticipated from available information.

12. ECOLOGICAL INFORMATION

ECOTOXICOLOGY
Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment. May cause long-term adverse effects in the aquatic environment.

CHEMICAL FATE
Aqueous abiotic hydrolysis expected to contribute to degradation. OECD 111

ECOTOXICITY EFFECTS

Toxicity to fish
LC50
Species: Zebra Fish
Result: 2.75 mg/l
Exposure time: 96 h

Toxicity to fish
NOEC
Species: Zebra Fish
Result: 0.56 mg/l
Exposure time: 96 h

Toxicity to fish
LC50
Species: Lepomis macrochirus
Result: 6 mg/l
Exposure time: 96 h

Toxicity to other organisms
EC50
Species: Daphnia similis
Result: 22.61 mg/l
Exposure time: 48 h

Toxicity to other organisms
NOEC
Species: Daphnia similis
Result: 10 mg/l
Exposure time: 48 h
Silwet* L-77
Siloxane Polyalkyleneoxide Copolymer

Toxicity to other organisms
EC50
Species: Daphnia magna
Result: 37 mg/l
Exposure time: 48 h

Toxicity to other organisms
NOEC
Species: Daphnia magna
Result: 25 mg/l
Exposure time: 48 h

Toxicity to algae
EC50
Species: Selenastrum capricornutum
Result: 5.5 mg/l
Exposure time: 96 h

Toxicity to algae
NOEC
Species: Selenastrum capricornutum
Result: 1 mg/l
Exposure time: 96 h

Toxicity to microorganisms
MEC90
Species: Spirillum volutans
Result: > 0.201 mg/l
Exposure time: 120 min
(highest concentration tested)
Uncoordinated mobility in 90% of the population

Elimination information (persistence and degradability)
Biodegradation
The product is not readily biodegradable.

13. DISPOSAL CONSIDERATIONS

DISPOSAL METHODS
Disposal should be made in accordance with federal, state and local regulations.
14. TRANSPORT INFORMATION
